<td>Loneliness and social isolation are associated with depression, decreased cognitive function, increased blood pressure and cholesterol and even premature death. Learn how you can develop social cohesion and improve mental health in your organization and community. You may even walk away with a prescription to enjoy the outdoors.</td>
<td>This session explores how health, transportation and land use can converge to form livable communities through proactive planning of bicycling and walking infrastructure. Planning is becoming increasingly important in helping communities identify shared, implementable goals that improve residents’ health and well-being.</td>
<td>This session will provide an overview of social determinants of health and discuss the role they play in quality of life outcomes. Experts will highlight efforts to address upstream social determinants of health that include transportation and land use decisions.</td>
